REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: As previously noted in Paper No. 16, applicant's arguments filed 3/10/98 concerning claim 1 are convincing with respect to the prior art of record. Applicant's remarks filed 5/4/98 have clarified where the specification as originally filed provided support for claims 7, 8, 14, 15, 20, and 29, and accordingly the 112, first paragraph rejection of these claims is withdrawn. Applicant's terminal disclaimer filed 5/4/98 is proper and has been recorded, which obviates the double patenting rejection made in item 9 of Paper No. 16. It is noted that U.S. Patent 5,731,047 to Noddin does not constitute prior art against the presently claimed invention owing to its later filing date, nor does it claim the same invention as that of the instant application. It is further noted that the allowed claims distinguish over the newly-cited Martyniuk article in that Martyniuk, like the other prior art of record, fails to suggest the use of two different repetition rates to produce two different energy densities as recited in claim 1, and similarly fails to suggest the use of two different energy densities with the claimed sets of parameters to form a blind via as in claim 32. Martyniuk suggests using but one energy density in forming *blind* vias.
